

Association for Women in Mathematics
AWM Student Chapter
invites you to our

SNOWFLAKE WORKSHOP:

Mathematics of Fractals

Date: Thursday, December 4th

Time: 3:30 – 4:30 p.m.

Place: LCB 219

Vira Babenko
University of Utah

Abstract: A fractal is a natural phenomenon that exhibits a repeating pattern that displays at every scale. They are found in places as small as a cell membrane and those as large as the solar system. Winter holidays are just around the corner, and what can be a better way to welcome them than crafting 3D snowflake-fractals and watching a great documentary “Hunting The Hidden Dimension” (Nova 2008).
