	<b>Question: Comments on course effectiveness</b>
	This course was one of the most beneficial courses I have ever taken. The material presented efficiently and carefully, giving each and every student an opportunity to learn the material in their own way. My absolute favorite thing about this course is that Kelly focused on the students understanding of the material first, and the actual coursework second. This course taught me more than just mathematics, it taught me how to think and organize myself.
	The pre-written notes were very nice to have and to study from. Also, the review sessions before the final exam helped me prepare and review for the final.
	online textbook and hard copy textbook was good.
	The book was not so helpful, but the teacher's notes helped a lot.
	MacArthur's notes were helpful
	Opportunities to practice course content before exams helped.
	Maybe give a review for the final of all the work we cover in the class that would of been super helpful!
	Clearly presented notes and examples of problems.
