Instructor	Text Responses
	<b>Question: Comments on course effectiveness</b>
	Videos were so helpful. And the quizzes made it so we had to keep up and was extra practice which was great
	The videos served as great learning tools. The class notes cleared up concepts significantly.
	The shortened time frame and essential focus on the class allowed me to continually think clearly about what I was learning.
	Online Videos, Learning before class
	It was very interesting
	The most organized class that I have every taken at the University of Utah. I really understand calculus because of this class.
	I thought the course was designed well and the progression made sense, starting with limits and moving from there etc. I really appreciated learning the definitions of things before the shortcuts, helped me get a better fundamental understanding.
	The videos and test reviews
	This was an extremely fast passed course that helped me face the stuff I had trouble with and gave a clearoutline of what I was learning!!
	Lecture videos were extremely effective, a ton of examples were covered in class, which benefited me tremendously.
	Fast paced. No graded homework but a quiz everyday belief me learn better.
	Fast and in depth
	<b>Question: Comments, suggestions on instructor performance</b>
MacArthur	Very approachable. Was a great teacher and was good at explaining things
MacArthur	She was friendly, approachable, eloquent, experienced. She could easily explain higher level concepts in a fashion that anyone could understand. She was inspiring, encouraging and showed legitimate concern for her student's learning and well being. She was always prepared and could work through problems easily, quickly and efficiently which gave us time to go over many other things in depth.
MacArthur	Always prepared and always attentive to students.

MacArthur	She was super gooooooood
MacArthur	Kelly MacArthur is the best professor that I have ever had. She is so prepared for class and I can tell she loves to teach. One of the best experiences that I have had in college was in this class. Loved it.
MacArthur	The content was explained really really well. I felt like most topics were went over in the videos in great enough detail that I could fast forward through parts I understood and get an in depth demonstration for areas I had difficulty with. Also, in-class examples were well explained and in most cases multiple routes to the solution were explored which was very helpful. Great professor who handled a fast-paced, difficult class better than I expected!
MacArthur	She has mastery of the material. She is a great teacher and communicator. She is always well prepared and proactive in addressing concerns. She prepares extra review material for exams. She pushes her students so the will succeed in testing.
MacArthur	She was always open to question and she would work through them with you. She also helped me when I had other arrangements by taking a test earlier.
MacArthur	While she writes and talks fast, in general, Kelly knows how to explain things in a way that her students will understand. She was an extremely effective teacher, and it is hard to observe weaknesses in her teaching style.
MacArthur	If I could take every math class from Kelly, I would. She is seriously one of the best teachers I have ever had.
MacArthur	Great explanations. Knows her calculus.
MacArthur	Motivated and excited to teach math
