Instructor	Text Responses
	Question: Comments on course effectiveness
	Best organization in a math class. Period.
	Video lectures were helpful. The way homework was structured is something I wish more classes followed. Homework is discussed, solutions are provided but it isn't graded.
	The shortened time frame and essential focus on the class allowed me to continually think clearly about what I was learning.
	online videos were very effective.
	Videos and test reviews.
	Videos and examples in class were the key to success.
	Fast paced. Quizzes everyday but no graded homework. Flipped classroom.
	We could have used a little more room on our note-cards for the final exam. It would have been helpful if we were given the integral table out of the back of the exam and/or any of the integrals we would need during the test in order to be able to answer the questions. In the past I have seen instructors in small classrooms offer to give people the necessary integrals during the tests for the price of a few points on the question.
	I disliked the ordering between infinite series and infinite integrals. infinite integrals make significantly more sense once you've seen the harmonic series and at least 1 geometric series, even if you aren't ready for the rest of series testing and such. I did really enjoy the series section.
	Question: Comments, suggestions on instructor performance
MacArthur	The lecture videos helped a lot. Best math class I've had in college.
MacArthur	Homework discussions as well as midterm reviews were vital to my success in this class.
MacArthur	Always prepared and always attentive to the students.
MacArthur	thank you for hard but reasonable tests.
MacArthur	She is an exceptional teacher. Her lecture videos are very effective. Her rigorous lectures and quizzes prepare students well for tests. She prepares very well and pro actively addresses student concerns.

MacArthur	Kelly was an awesome teacher, and was all around awesome at teaching this course. There was really nothing that could have been improved upon, everything was great.
MacArthur	Kelly created a terrific environment for learning, an environment that fostered respect, encouraged questions and was not intimidating.
MacArthur	Great explanations. Knows her math.
MacArthur	Nothing
MacArthur	She understood the subject, and beyond. Being able to catch glimpses of future coursework involving this, and more immediate applications, was awesome.
