

## 14.1 Area

Area--2-d measurement of space inside 2-d shapes (or on the outside of a 3-d shape)

(a) square

(b) rectangle

(break into squares)

(c) parallelogram

(d) triangle

(e) trapezoid

(f) circle

## Area and Perimeter

Find the area and perimeter of the lattice polygons:

3. If one rectangle's sides are twice as big as another similar rectangle, what is the scaling factor of their areas? (In other words, if the length scaling factor is 2, what is the area scaling factor?)
