- good class
- I think Kelly is the best math teacher. She explains concepts so well. I can tell that she loves what she does. My only suggestion is on the final. It was a brutal final. Very difficult. I did not have enough time to finish it. A lot of the class was still there when we were asked to turn in the final.
- The practice problems were very helpful. The test study guide and recommended problems really helped me know the material for the tests.
- The course progressed at a very difficult pace. I wish the drop date was later in the course, so I would have had a chance to realize that the summer class was not a good fit for me.
