Dear Agent,

In your recently submitted form 58 we have noticed some discrepancies. Please be advised that form 58 is only to be used to obtain reimbursement for poisons, explosives and other hazardous materials. Our quality control officer does not understand how 127 gallons of cookie dough ice cream can be used as a weapon of limited or mass destruction (the clogging of enemy arteries we believe is an inefficient use of funds) and so your request for \$601.98 in reimbursement has been denied. You are welcome to submit a new copy of form #58 (the requisite three copies are attached). Alternately, if you have a weaponization of ice cream, please describe it and resubmit your form.

Sincerely,

Walter Waldon
